

Physiotherapists' perspectives of telehealth for children with developmental delay

Focus group and interview questions

1. What are your experiences of using telehealth with this population group?
2. In considering telehealth, who has received training and what did that entail?
What was/wasn't helpful
3. From your experiences, what has facilitated your use of telehealth?
how competent they were and some families were a lot easier to manage than others.
4. From your experiences, what have been challenges in your telehealth delivery?
5. Do you have any solutions to these challenges?
6. What are your feelings around using telehealth in the future?
7. Knowing what you know now, would you do anything differently in the implementation of telehealth service delivery?
8. Is there anything we have missed?
